WE MAKE IT HAPPEN THE FUTURE OF DEFENSE INTEGRATION STARTS HERE

CONNECTING U.S. CAPABILITIES, PARTNER NATIONS, AND MISSION-READY SYSTEMS

Advanced IT Concepts Management Company (AITCMC) enables the Future of Defense Integration by connecting people, technology, and operations across Foreign Military Sales (FMS) and coalition environments. Operating from Riyadh, Saudi Arabia, AITCMC serves as Advanced IT's regional hub for international defense programs, bringing more than two decades of proven U.S. defense contracting experience to allied and partner-nation missions.

Defense integration is no longer a future concept; it is an operational requirement. AITCMC delivers secure, interoperable, and mission-aligned solutions that ensure systems, forces, and stakeholders operate as one.

THE FUTURE OF DEFENSE INTEGRATION—MADE REAL

The future of defense depends on the ability to integrate systems, forces, data, and decision-making across nations and domains. AITCMC enables this integration by bridging U.S. program offices, industry partners, and partner nations, ensuring technology and operations align from planning through sustainment.

PROVEN DEFENSE EXPERTISE

AITCMC draws on 150+ years of combined military, government, and defense contracting experience, including former senior military leaders, program managers, engineers, and technical specialists with deep joint and coalition operational knowledge.

GLOBAL PRESENCE | LOCAL EXECUTION

- **Riyadh, Kingdom of Saudi Arabia** – International Programs Office
- **Orlando, Florida (USA)** – Engineering, integration, and program support

This integrated model enables secure delivery, effective coordination, and trusted execution for allied defense programs.

WHO WE SUPPORT

- U.S. Department of Defense
- Allied & Partner-Nation Ministries of Defense
- Joint & Coalition Forces
- Federal and Public Sector Organizations

HOW WE ENABLE DEFENSE INTEGRATION

INTEGRATED FMS LIFE-CYCLE EXECUTION

We deliver end-to-end FMS support, from pre-award planning through sustainment and close-out, aligning U.S. acquisition, logistics, training, and sustainment activities with partner-nation operational needs.

Result: Capabilities are delivered, fielded, and operationally integrated from day one.

INTEROPERABLE IT & CYBER ENVIRONMENTS

We design, modernize, and sustain secure, scalable IT infrastructure that supports multinational and coalition operations, enabling trusted data sharing, mission command, and cyber resilience across FMS environments.

Result: Coalition-ready networks that are resilient, compliant, and interoperable.

TRAINING, SIMULATION & OPERATIONAL INTEGRATION

From high-fidelity simulators to deployed training systems, we integrate U.S. training capabilities with partner-nation forces, ensuring realistic, interoperable training that prepares forces for joint and coalition operations.

Result: Mission-ready forces trained to operate together.

OPERATIONAL INTEGRATION ON THE GROUND

With a permanent presence in Saudi Arabia, AITCMC provides in-country execution that connects strategy to action, coordinating U.S. program offices, industry partners, and regional stakeholders to deliver integrated defense capabilities.

Result: Faster execution, clearer alignment, and sustained mission success.
